

DEBURRING EXPO

5th Leading Trade Fair for Deburring
Technologies and Precision Surfaces

10 – 12 October 2023

Trade Fair Center Karlsruhe | Germany

+ International
Expert Forum

Call for Papers

Be a speaker at the Expert Forum at DeBurringEXPO 2023

Take advantage of the expert forum to gain additional, valuable contacts by holding a practical, solutions-oriented presentation.

Automobile production, machinery manufacturing, aviation and aerospace, medical engineering, energy technology and other important industrial sectors are being challenged by global competition to continuously improve the quality, efficiency, functionality and profitability of their products.

Whether components are machined, formed, primary formed, forged, stamped, cut, sintered, moulded, eroded or additively manufactured, meeting demands placed on edge characteristics for downstream processes such as welding, bonding, sealing, coating or assembly is a great challenge for the manufacturing process.

DeBurringEXPO provides a unique overview of various equipment, systems, procedures, processes and tools, as well as measuring, test and analysis systems. Take advantage of this opportunity as a speaker at the expert forum in order to initiate dialogues with employees from the areas of manufacturing, production planning, R&D, design engineering, quality assurance and process engineering.

Participants

Technical and management personnel from manufacturing, production planning, technology, process engineering, quality assurance and R&D from all important industry sectors.

We look forward to your participation!

Information for Speakers

Theme Focus

- Avoiding or minimising the formation of burrs
- Reliable removal of disruptive burrs
- Production of defined edges / precision rounding
- Deburring with industrial robots
- Precision-machined surfaces
- AM parts finishing
- Cleaning after Deburring
- Measuring, test and analysis systems
- Quality Assurance
- Research projects, developments and trends

Presentation Submissions

Presentations should have an overall duration of at least 25 and no more than 30 minutes.

For documentation, as well as for the presentation itself, we require all accepted presentations in German and English. Introduction to your company must be limited to a single slide. Refrain from direct product advertising.

Interested speakers are requested to submit an abstract of their presentations to gitta.schlaak@fairxperts.de along with the following information:

- Firma: Name and address
- Speaker: First and last name
- Function: Position and scope of duties
- Contact: Phone, e-mail
- Title: Title of the presentation
- Abstract: Brief summary (max. 1 page in A4 format) as PDF or Word file)

Venue / Date

Trade Fair Center Karlsruhe / 10 to 12 October 2023

Deadlines

- **23 June 2023**
Submission deadline for abstracts
- **21 July 2023**
Latest notification of acceptance of presentations
- **01 September 2023**
Submission deadline for final documentation of the presentations

The presentations will be simultaneously interpreted German «» English
